Career Foundry
March 2021- Feb 2022

Frontend Development for Designers

Career Foundry
Feb 2022- April 2022

MEng Civil Engineering

City, University of London
Sep 2014-July 2018

UX Design Projects

Thailo

Career Foundry

Apr2021-Feb2022

- It is hard to track the amount everyone owes after a get-together event.
- Applied double diamond strategy to conduct competitive analysis, define user persona, and develop a solution-focused design that included features like splitting the money. Conducted usability testing on a high fidelity prototype.
- Iterated the design according to the end-user feedback and to suit the accessibility.

Learn & Grow

Career Foundry

Mar2021-Apr2021

- It is hard to continue learning a new language in a busy schedule.
- Conducted user interviews to understand their pain points. Most participants are used to listening to podcasts and audiobooks.
- Designed a language learning app that allows users to learn a new language by listening and reading stories. Users can now learn by listening while commuting to work or any while working.

Work Experience

CAD Technician

Cluttons

Dec2021-Present

- Working with a wider CAD team for developing lease plan drawings and designing sub-stations using AutoCAD and interacting with engineers to discuss and finalise sub-station designs specific to each individual site.

CAD Technician/ BIM Designer

Beta Design Consultants

Jul2019-Nov2021

- Liaising with clients, engineer and suppliers daily, to ensure designs meet the standards and to ensure the timely completion of the project.
- Steer appropriate drawings interpretation and change management as a result of new on-site findings in compliance with builders.
- Facilitate clients for structural queries and changing demands via effective/continuous communication to ensure maximum client satisfaction.
