UX Design Projects

Thailo

CareerFoundry

Apr 2021-Feb 2022

- Created a responsive mobile banking app that included features like money transfer, e-wallet and managing finance.
- Applied double diamond strategy to conduct competitive analysis, define user persona, and develop a solution-focused design. Conducted usability testing on a high fidelity prototype.
- Iterated the design according to the end-user feedback and the final design included accessibility checks as per WCAG.

Learn & Grow

CareerFoundry

Mar 2021-Apr 2021

- Designed a vocabulary learning app that allows users to learn a new language by listening and reading stories.
- Carried out competitive analysis to discover the strength and weaknesses of the existing vocabulary app.
- Conducted research analysis to create the user personas and usability testing on a low-fidelity prototype to create a solution-focused design.

Work Experience

CAD Technician

Cluttons

Dec 2021-Present

- Working with a wider CAD team for developing lease plan drawings and designing sub-stations using AutoCAD
- Interacting with engineers to discuss and finalise sub-station designs specific to each individual site.

CAD Technician/ BIM Designer

Beta Design Consultants

Jul 2019-Nov 2021

- Liaising with clients, engineer and suppliers daily, to ensure designs meet the standards and to ensure the timely completion of the project.
- Steer appropriate drawings interpretation and change management as a result of new on-site findings in compliance with builders.
- Facilitate clients for structural queries and changing demands via effective/continuous communication to ensure maximum client satisfaction.
